March 26, 2012

To Whom It May Concern:

This letter is to confirm that neither **Fiesta Water Solutions** nor **Alamo Water Softeners** are certified by the **Water Quality Association (WQA)** according to any recognized industry standard. Further, the Water Quality Association is not in a position to endorse or recommend any water treatment device, certification notwithstanding.

If you are aware that **Fiesta Water Solutions** or **Alamo Water Softeners** are making any claims to the contrary, please feel free to file a formal complaint with WQA (including any evidence of such claims), so that we can take prompt and decisive action.

NSF industry standards certification may be provided by several organizations, of which WQA is only one example, and we cannot speak to whether any such certifications exist with any other organization outside WQA.

Please feel free to contact me if you have any further questions.

Sincerely,

Maggie Hartung, CWS-VI  
Product Certification Coordinator  
Water Quality Association
